# HECTOR'S WORLD SAFETY BUTTON™

The Hector's World Safety Button™ is a child-activated safety tool which children can use if something on-screen upsets or worries them.

The Hector's World Safety Button is a simple executable file which you can download here for free. http://hectorsworld.netsafe.org.nz/teachers/hectors-world-safety-button/

The file installs a swimming Hector's World™ character on the computer screen.

 A child can just click on Hector character, who then covers the screen with a beautiful underwater scene and gives the child a positive written message, while encouraging them to get adult help.
